

Deep Dive - Terraform

SETTING THE STAGE

Ned Bellavance

FOUNDER, NED IN THE CLOUD LLC

@ned1313 www.nedinthecloud.com

Are You Ready?

Terraform command line

Variables and values

Providers and provisioners

Resources and modules

Additional Technologies

Amazon Web
Services

Docker

Jenkins

Ansible

Consul

Terraform Cloud

SaaS offering

Remote state

Remote execution

Variable and secret storage

Source control integration

Globomantics

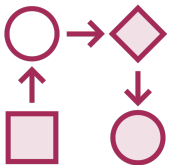

Success is rewarded with more work

No admin is an island

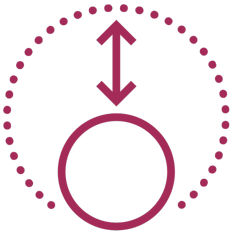

Integrate with development

Automate all the things

Course Content

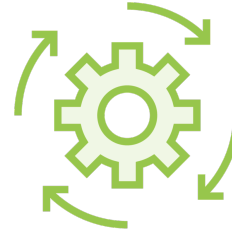

Import existing resources

Data sources and templates

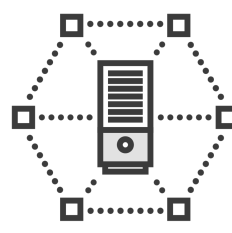

Managing state data

Adding a CI/CD pipeline

Workspaces and collaboration

Integrate with config managers

Summary

Are you ready for the challenge?

Prepare your environment

Things are going to get DevOps

Take Terraform to the next level

Coming up:

- Working with existing resources
